

# UTG GEN III

## Blank-Firing Adapter

### **IMPORTANT!**

**Before installation, ensure firearm is clear before attaching blank-adapter.**

### NOTES

- Blank-firing adapter for .223 Model 4 (“M4”) rifles with a 20” barrel is RED (p/n BFA-MIL223R).
- Blank-firing adapter for .223 Model 4 (“M4”) carbines with a 16” barrel is YELLOW (p/n BFA-MIL223Y).
- Use only B223M200CS (M200A) blank ammunition with these adapters. DO NOT use “Hollywood .223” blanks as this could cause serious damage to firearm and operator.
- Every 50 rounds, check to ensure the adapter is still hand-tight and secure.
- Clean carbon build-up after each use.
- **DO NOT** use tool to tighten the adapter. Hand-tighten ONLY.

### INSTALLATION

1. Unscrew the bolt and slide it all the way out.
2. Hook the adapter into the first groove of the flash suppressor.
3. Slide the bolt into the flash suppressor and **HAND TIGHTEN**. **DO NOT** use any tool.
